Continue

*Website Developer*

- Currently I am working as a freelancer at Fiverr.com. I am a level 2 seller, and I have completed more than 50 Website Projects while maintaining a good rating of 4.9 out of 5. Besides Website Development, I am also providing the data manipulation and scraping services at fiverr.

## PROJECTS & PORTFOLIO

---

I have I have successfully completed numerous projects as a freelance website developer, with some of the key highlights being:

- **CMS FOR DATACOLABX**

I developed a custom CMS for DataColabX in Cambodia, a company providing data-driven solutions. Built in Laravel, this CMS offers the flexibility of drag-and-drop page building, similar to WordPress with Elementor. Users can easily design web pages, track interactions, and apply dynamic styling based on events like hover, click, and visit, ensuring a seamless and interactive website-building experience.

- **Vidsauto.com**

VidsAuto is an online platform for vehicle repair guides, where the owner uploads videos and documentation to help users fix specific car issues. I developed the system to allow mechanics to contribute their own repair content and earn from their submissions, creating a valuable resource for car owners and professionals.

- **Pindersferry.com**

This website allows the customers to book ferry online and also helps the admin in managing the tasks.

- **Animeperson.com**

Animeperson.com not only features the upcoming and recent anime but I have also developed a chatbot for this website using ChatGPT and OpenRouter.

- **Cheekandchin.com**

CheekandChin is an online cosmetic store where I developed a seamless e-commerce platform to help them sell their products efficiently. The website provides a user-friendly shopping experience, making it easy for customers to browse, purchase, and receive their favorite beauty products online.

- **Digiteq.com**

Digiteq is an e-commerce platform where I implemented an automated system to update prices, stock status, and availability for over 52,000 products, ensuring accurate and real-time inventory management.

- **Fisheries Department of Cambodia**

I developed a data management tool for the Department of Fisheries in Cambodia, designed to streamline research and data organization. This tool enables efficient categorization, classification, and management of fisheries data, allowing researchers to specify regions, create listings, and analyze information for study purposes.

- **Data Conversion tools**

I have developed custom data conversion tools for multiple clients, enabling them to process and transform data into various formats to extract valuable insights and automate tasks. Each project was tailored to the client's unique requirements, ensuring efficient data handling and optimized workflow solutions.

- **Rental X**

Rental X is an online rental ads placement platform where property owners can list their rentals, making it easier for consumers to find and benefit from available listings. The platform streamlines the rental process, connecting owners with potential tenants efficiently.

## SKILLS

---

**Programming Languages / Frameworks:** HTML, CSS, JavaScript, jQuery, Bootstrap, AJAX, Core PHP, CodeIgniter, Laravel, C++, C#, WPF, WordPress and Open Cart.
